SUMMARY

Fullstack Developer (MERN) passionate about designing and developing scalable web applications using React, Node.js, and PostgreSQL. Experienced in building ERP and Inventory Management Systems with a strong focus on clean architecture, RESTful security, and smooth user interfaces. Enthusiastic about continuous learning, collaboration, and contributing to impactful software projects. Currently working and learning Fullstack development specializing in the MERN stack.

WORK EXPERIENCE

Fullstack Developer (MERN) — SkillBridge Institute of Technology (April 2024 - Present)

- Built a scalable inventory management system.
- Developed secure REST APIs using Express.js and PostgreSQL.
- Implemented server-rendered frontends with React for performance enhancement.
- Designed reusable UI components and optimized backend architecture.

Backend Developer Trainee — Google Developer Student Club (GDSC) (2024 - 2025)

- Contributed to the Visit Addis backend.
- Designed and managed APIs, routes, and database structures.
- Collaborated in open-source learning and hackathon projects.

EDUCATION

Bachelor of Science in Electrical & Computer Engineering (Communication Specialization)

Addis Ababa Science and Technology University (AASTU)
April 2022 – Present

Coursework: Java, C++, Data Structures & Algorithms, Database Scalability & Design

PROJECTS

Visit Addis — City Exploration App
Backend system built with Node.js and Express.js for managing tourism and destination data.
Frontend: React Query, TanStack, React Hook Form, Shadcn UI, Tailwind CSS.
Database: PostgreSQL.

Teachers Evaluation System — Java Desktop App
Developed a performance evaluation system with database integration for faculty review.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java
Frameworks & Libraries: React, Node.js, Express.js, SvelteKit
Database: PostgreSQL
Tools: Git, GitHub, VS Code, Postman
